

EXECUTIVE PERFORMANCE SOLUTIONS

EXCEL is harnessing its world-class technical and regulatory expertise to create competitive advantages for our clients by helping them to confront their most difficult challenges and turn them into opportunities. The EXCEL team of leading experts, with over 600 man-years of cumulative industry experience, will offer an unparalleled level and breadth of skill and service to help our clients address whatever challenges may lie ahead.

REGULATORY COMPLIANCE SUPPORT SERVICES

INSPECTIONS: EXCEL helps nuclear operators to prepare for and follow up on periodic and reactive (9500X Series) inspection activities by providing mock inspections and other services.

OVERSIGHT: EXCEL provides support for interaction with the regulator in dispositioning Greater-than-Green inspection findings and assistance in improving performance problems that have moved performance out of Column 1 of the ROP Action Matrix.

ENFORCEMENT: EXCEL ensures a robust and professional response to traditional enforcements by providing guidance, preparation, and coaching for enforcement conferences, Alternative Dispute Resolution sessions, and Safety Culture issues.

INTERACTIONS WITH THE NUCLEAR REGULATORY COMMISSION AND NRC SENIOR STAFF: EXCEL brings personalized coaching for pre-Commission Meetings, Drop-in preparations for meetings with Senior NRC leaders in Headquarters and the Regions, and the development of Regulatory Communication Plans.

TECHNICAL, LICENSING, AND OPERATIONAL SUPPORT SERVICES

AUTHORIZATION: EXCEL delivers support for licensing actions for nuclear facilities and other highly regulated entities. Includes full-scoped license applications, license amendments, requests for exemptions, and other requests, including implementation of National Environmental Policy Act (**NEPA**) responsibilities.

ENGINEERING: EXCEL provides consulting services (and staff augmentation) to nuclear and non-nuclear energy facilities in engineering and plant maintenance where those activities are needed for safe operations of the facility.

OPERATIONS: EXCEL helps with Licensed Operator examination preparations, including written, simulator, and operating examinations; and also supports training for non-licensed operators and for mechanical, electrical, I & C, health physics and radiation protection.

HEALTH PHYSICS AND RADIATION PROTECTION: EXCEL aids in the development, testing, and validation of programs for health physics and radiation protection to ensure that radioactive materials are used and stored safely.

EMERGENCY PREPAREDNESS AND INCIDENT RESPONSE: EXCEL supports the development, testing, and validation of emergency preparedness and response programs that ensure client sites are prepared to react to a wide spectrum of emergencies.

NEW BUILD AND INTERNATIONAL: EXCEL has many consultants with extensive international and New Build experience, ranging from former high-level executive regulators to expert consultants with proficient implementation qualifications.
